14th October 2011

Dear Eli

I do hope all is well and I just wanted to write to say thank you for all your tremendous help this year. We are very grateful and it has made all the difference to both Mkomazi NP and Kora NP.

I know that Lucy is putting together a report for you but just at a brief glance....our wild dogs are eating very well and benefitting from the extra meat. I am now buying a new freezer and extending our butchery to make sure there is enough cold storage for this meat. The rhino fence replacement gang is working non-stop and the fence posts are being used to good effect on the replacement and to keep the integrity of the fence line intact. Kora is ticking over. The Somalis have been in there during the terrible drought, but we heard yesterday that Kora had some rain. The chain link is now up in Kampi ya Simba and the lion compound has been redone. Jamie Manuel is there now mapping the park with a GPS programme.

Attending to all these sorts of things makes the projects work and keeps them sustainable, so all our sincerest thanks for your great support and understanding.

I hope you had a good trip to Africa.

With kindest regards as always.

Tony
